

FluidClean®

Our In-Line Filtration system will reduce operating downtime and save in maintenance costs.

WECHSLER
TECHNOLOGIES & ENGINEERING

Our In-Line Filtration system will reduce operating downtime and save in maintenance costs. You'll have fewer pump failures, reduced fouling of process equipment, and less frequent fluid replacement. Wech Tech's filtration system can reduce particulate matter down to 10 microns.

Handles hot oil and various types of thermal fluids

Up to 750 °F operating temperature

Small footprint

Follows ASME standards

- Available in active side-steam configurations comprised of filter and pumps, or passive slipstream, using existing process pump
- Operator panel with automatic pump start, auto-cool, operating hours, clogged filter alarm
- Unique "auto-cool" water cooling system allows quick and safe changeout of filters, without requiring duplex systems
